

LADDERSTORE

Bespoke Roof Access Solution for a Prestigious Residence

One of the bespoke products we sell at Ladderstore is designed to provide easy access to roof areas. We recently worked with Messenger Construction to enable access to a prestigious residence.

“Access was required to all areas of the various roof slopes, flat leaded areas and raised roofs, including towers. This meant we had to be able to pass over other roofs safely without damaging the slates” said Brian Hembrow of Messenger Construction.

Messenger Construction is run by a team of highly experienced construction professionals with a wealth of knowledge in both sympathetic conservation and restoration projects. They also construct innovative new buildings within historic settings.

“Price always drives decision in any project, but it was helpful that Ladderstore carried out a full survey and provided a very competitive price for supply and fix. They also provided valuable advise on coatings and regulation compatibility regarding the hand rails required.”

“It was a pleasure to build a relationship as the job grew. The access ladders are very practical and look superb with the black powder coating. We would definitely order from Ladderstore again without question”.

Ladderstore can manufacture and supply bespoke ladders and custom designed access equipment to meet a range of specialist requirements. Available custom ladders include safety cages, retractable ladders, drop down ladders, walkways and roof access.

If you are interested in any of these products or would like to discuss your specific requirements please contact Jacky on 01204 590 232 or email jacky@ladderstore.com.
