# Aircraft Access Solution for Executive Aviation Company

**L**ondon Executive Aviation provide private jet charter, sales and aircraft management at multiple bases around London. We were recently contacted by Chris Cohen, Licenced Aircraft Engineer who needed a solution to an aircraft access problem.

LEA needed a way to access their Beechcraft Kingair aircraft. They picked the Fixed Single Sided Platforms with Single Handrail.

*“The ladders are being used to assist in putting on the nose covers on our Beechcraft Kingair aircraft. They are the perfect height, very light yet sturdy, and they have the hand rail on one side only which is great for access to the aircraft”* says Chris.

The Fixed Single Sided Platforms with Single Handrail can be factory fitted on left or right side (supplied loose). Constructed from heavy duty channel section with deep treads (80mm deep) with a deeply ribbed non slip surface for added safety. Each tread is double riveted for extra rigidity with front and rear stays on the bottom tread for increased strength. These steps are also ideal for use when performing routine maintenance on machinery in a factory environment or accessing shelves in a library.

Chris was very happy with the service they received. “We have purchased from Ladderstore in the past and found it to be a smooth process with quick delivery.”

**If you would like to find out more about our range of fixed access platforms or would like to discuss your requirements, call Jacky on 01204 590 232 or email [jacky@ladderstore.com](mailto:jacky@ladderstore.com).**
