# Tree Surgeon Company Pleased with New Extension Ladders

**T**ree Surgeon company Maydencroft Ltd chose the Youngman Trade 200 Extension Ladder from Ladderstore to provide safe access when inspecting and pruning trees at height.

“We were very pleased with our purchase of the Youngman Trade 200 Extension Ladder from Ladderstore. As a contracting company, our tree surgeons require the ladders on a daily basis to undertake Arboricultural tasks such as tree inspections and pruning, often with heavy equipment in hand. We therefore needed a set of good-quality, light-weight ladders that we knew would be safe and durable, and Ladderstore were able to offer just that.” said Alison, Ecological Advisor from Maydencroft.

The Youngman Trade 200 extension ladders are made from lightweight aluminium, exceptionally robust and built to last. Tested and certified to EN 131 they have a ‘Push-up’ operation with high-performance box-section alloy stiles. Slip-resistant square rungs provide excellent grip while interlocking clips secure sections together for safe use and transport. Duty Rating of 110 kg / 17.3 st with a vertical static load of 150 kg / 23.6 st.

“Ladderstore provided excellent customer service and our tree surgeons are very pleased with the product as it allows them to perform all of their tasks with efficiency and reassurance.”
