

# Health & Safety Solution for Graphic Design Supplies Company

**S**afety should be a priority for every company working at height. North West supply company Graphic Design Supplies addressed an issue they had in their warehouse with a mobile warehouse step from Ladderstore.

“We recently underwent a Health & Safety review – we are only a small business, but staff welfare is hugely important and our warehouse is getting busier so one of the items flagged was to purchase a better ladder for our warehouse staff working at height” said Kate Walker of Graphic Design Supplies Ltd.

“We found you on Google whilst searching for ‘warehouse ladders’. We clicked through and your prices looked good and the website was easy to use so we looked no further. We were easily able to choose the correct design and height from your online info and are delighted with the service provided by Ladderstore. The ladder arrived ahead of schedule and is perfect. The order process was very smooth.”

Suitable for all retail, commercial, office, warehouse and even military applications, The Klime-Ezee Industrial Mobile Warehouse Steps are available in platform heights from 1250 to 3750 mm. Features include fully welded, steel construction 550 × 200 mm tread width and a central bar braking system. The Klime-Ezee has a 300 kg safe working load, is easy to manoeuvre and has a durable powder coated finish.

“Our warehouse manager David is very happy with the new ladders and it’s made life much easier (and safer!). We can now safely use the higher sections of our racking for our growing stock! Really happy all round and would highly recommend your company.”
