

Vehicle Access Now Much Easier for Timber Engineering Company

We recently wrote an article about vehicle access safety for National Lorry Week. In particular we discussed how to prevent being one of the 2,000 people who fall from vehicles each year. Our customer Yorkshire Timber Engineering contacted us to tell us how the Loadstep Vehicle Access Ladder had made accessing their vehicles easier and therefore safer.

“We purchased the Loadstep Vehicle Access Ladder to help our driver gain easier access onto our rigid vehicle. Combined with the built in grab handle it has proved to be a great success for the driver on the site’s we visit” said Stephen Prescott, Director of Yorkshire Timber Engineering.

The Loadstep Vehicle Access Ladder enables easy access to the bed of any goods vehicle. Supplied with easily installed brackets and locks for secure storage on vehicle, a fold away 1 metre handrail for safe step through on to and off the lorry bed, and integral tie to allow ladder to be secured to vehicle.

The folding top platform lies flat on the lorry bed to form the correct stepping off angle while the integrated camming action makes it impossible for the ladder or platform to slip or move, providing extra security and stability.

This is an industrial strength ladder made to the same specification as Class 1 kitemarked ladders whilst still being lightweight. It can be used all around a vehicle, accommodating a variety of ground and load levels.

If you would like to find out more about our range of Vehicle Access Ladders or would like to discuss your requirements, call Jacky on 01204 590 232 or email jacky@ladderstore.com.
