

Work Platform Comparison

ZAP Access Platform vs. Sherpascope

	ZAP	Sherpascope
Heights		
Overlapping heights between both work platform sizes	Yes	No
More than 3 platform heights for each size	Yes	No
Closed height of the largest platform is below 3 m	Yes	No
Fits inside a Vivaro/Traffic long wheel base van	Yes	No
Stabilisers		
Inverted stabilisers <ul style="list-style-type: none"> - having the stabilisers angle inwards as opposed to in line with the ladder sections creates extra stability 	Yes	No
Easier and safer to move when erected due to inverted stabilisers	Yes	No
Tubular stabiliser legs which offer more strength	Yes	No
Stabilisers are fixed to the bottom section of telescopic ladder <ul style="list-style-type: none"> - therefore stabilisers do not need to be adjusted when platform height is lowered or raised 	Yes	No
Safety in use	Yes	No
Guardrails unfold and close automatically during opening & closing	Yes	No
Rung lock locking mechanism (not twist catch lock) <ul style="list-style-type: none"> - this practically eliminates finger traps 	Yes	No
Positive locking hook for platform and back section <ul style="list-style-type: none"> - prevents the platform lifting when erected 	Yes	No
Designs		
Wheels inside ladder stiles (not outside) this prevents damage	Yes	No
Two stabilisers for back and front sections <ul style="list-style-type: none"> - larger foot print 	No	Yes
