

# Telesteps Compact Loft Ladder & Made to Measure Loft Hatch - A Perfect Fit

**T**wo of our most popular loft products are the Telesteps 60324 Compact Loft Ladder and our Made to Measure Loft Hatch. It's particularly great when we sell them together, proving they are a great solution for that problem loft hatch.

“Apparently, according to my wife, knocking on for 60 is too old to be balancing on the top of a stepladder and hoisting myself into the loft, so for a quiet life, I decided to go for an extendable ladder option” said our customer Gary.

“I searched around the web for a suitable loft ladder and the Telesteps 60324 Telescopic Loft Ladder seemed to meet all of my requirements at a reasonable price. I purchased from you as your website seemed to be the easiest to navigate and based on previous experience, I only buy from people who have a UK ‘bricks and mortar’ address.”

“I am extremely pleased with the ladder. It was fairly easy to install, it is easy to operate and it feels like a solid product. I say ‘fairly’ easy because the only comment I would make is that it would be useful if it came with a dedicated ‘spring extender’. The only one I had was too thick to pull the spring and still allow it to clip onto the rods, so a little bit of brute force and scratched hands was required.”

The Telesteps Loft Ladder comes fully assembled and installation is just a matter of fitting six screws. Suitable for Ceiling Heights 2.45m, and for hatch sizes down to 520 x 600 mm. Form and function? These ladders look fantastic. The design is innovative and minimalist. The look is sophisticated and expensive. Extremely compact yet stable and safe to climb with zero loft space required and can be used in the tightest of spaces.

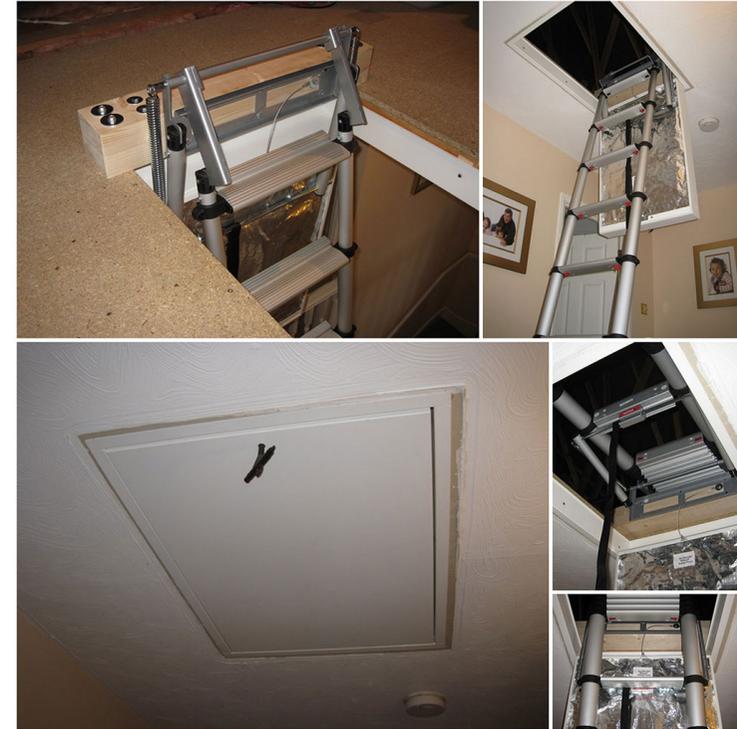

“I also purchased a Made to Measure Loft Hatch. I really didn't want to bother with having to revise the size of my opening so made to measure was perfect. It seemed like you were only one of a few companies who offer this at a reasonable price, and having been confident with the ladder purchase, I went ahead. I was very pleased that you sent me a drawing of my proposed hatch to check, and it was also nice to get a speedy response to my question about the tolerances. I was very happy with the ease of installation of the hatch (once I used 4 clamps to temporarily hold it in place instead of the two I had) and apart from one little issue, the finished article is excellent.”

The Made to Measure Loft Hatches comply with all the updated energy conservation and air leakage requirements of Building Approved Documents L,B and C. They fit flush with the surface of your ceiling and are probably the most inconspicuous loft hatch available. It comes supplied with instructions and diagrams to ensure the fire rated panels are fitted correctly.

The Made to Measure Hatch is available with a beaded frame (which makes the hatch door flush with your ceiling) or a picture frame.

“I am very happy with both products and would be more than happy to buy from you again. The end result is a very solid installation that I'm very confident with.”
